# QUIVERS

## STRAP DOWN BRACKET INSTRUCTIONS

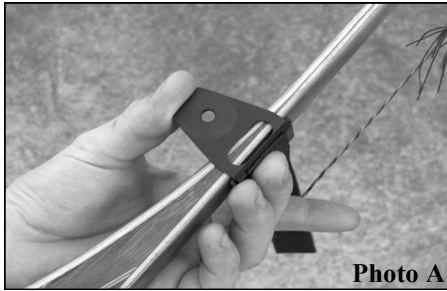

Photo A

**Step 1:** Firstly decide on which side and where you would like to position your **Marksman Quiver** on your bow.  
On a Longbow under the points of the fade outs (**Photo A**) On a Takedown Recurve, as close to the riser as possible

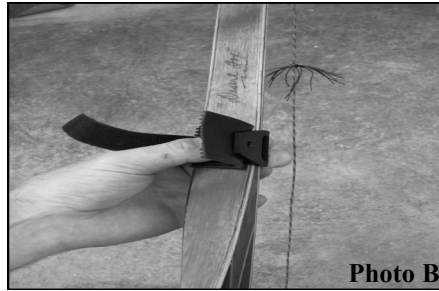

Photo B

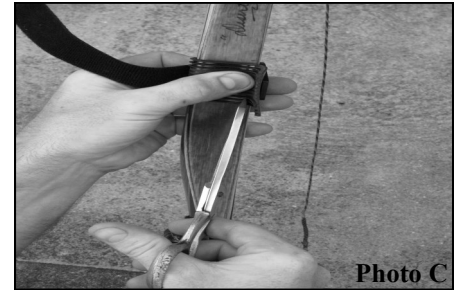

Photo C

**Step 2:** Hold the bracket on to the bow and wrap the rubber around the limb (**Photo B**)  
Make a small snip with scissors as close to the bracket as you can. (**Photo C**)

**Step 3:** Remove bracket and continue to cut the rubber .

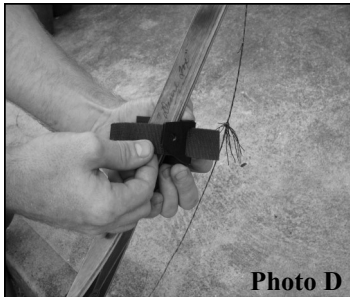

Photo D

Photo E

**Step 4:** Hold bracket near limb and thread Velcro through the slot (**Photo D**) Pull to loosely secure bracket in place. (**Photo E**)

Photo F

Photo G

**Step 5:** With the back of the bow facing you hold bracket in place with your thumb. Apply pressure while pulling Velcro in a semi circle motion to wrap around the limb, following the path of the first layer of Velcro . (**Photos F& G**)

Photo H

**Step 6:** Mark the Velcro in the same way as rubber in **Step 2** and cut off the excess.

(**Photo H**)
